

- Petition -

To the Honourable the Legislative Assembly of the Province of British Columbia, in Legislature Assembled:

The petition of the undersigned, KamloopsA4C, of the city of Kamloops, BC, states that:

Canadians call upon the **Minister of Environment and Climate Change Strategy, Honorable George Heyman** to put an end to the spraying of toxic chemicals in the atmosphere known as geoengineering over the air space of British Columbia.

- Geoengineering is the artificial modification of Earth's climate systems through two primary ideologies, Solar Radiation Management (SRM) and Carbon Dioxide Removal (CDR). The theory is that stratospheric sulfate aerosols (SRM) create a global dimming effect and are used in geoengineering to limit the effect and impact of climate change due to rising levels of greenhouse gases;
- Weather modification has also been used for military purposes as well. Weather-modification for military use has been acknowledged by the US Air Force as seen in document AF 2025 Final Report. During the Vietnam war, "Project Popeye" was a weather modifying operation to cause constant rain in an effort to turn all roads into flooded water ways.
- In 1958, the US military announced success in weather modification by sending powerful electromagnetic beams into the upper atmosphere, using ionospheric heaters. The 1996 USAF document, *Owning the Weather in 2025*, promised that "*weather-modification can provide battle-space dominance to a degree never before imagined*" – using the ionospheric heating facility, HAARP.
- Weather modification AKA Geoengineering has been conducted in various forms since 1891 when the first Patent was obtained - Patent #0462795 Method of Producing Rain-fall. Since then there have been thousands of Patents obtained on weather modification strategies.
- Adopted by Resolution 31/72 of the United Nations General Assembly on 10 December 1976 UN Weather Weapons Treaty - CONVENTION ON THE PROHIBITION OF MILITARY OR ANY OTHER HOSTILE USE OF ENVIRONMENTAL MODIFICATION TECHNIQUES - the Convention on the prohibition of military or any other hostile use of environmental modification techniques. This defined weather weapons as "*environmental modification techniques*", encompassing "*any technique for changing – through the deliberate manipulation or natural processes – the dynamics, composition or structure of the Earth.*";
- The most common chemicals used in Geoengineering sprays are nano sized particles, are aerosolized and have been found to consist mainly of aluminum, barium or strontium, however multiple other compounds and miscellaneous chemicals, heavy metals and substances are used;
- The science on global cooling, global warming or climate change is not set and mainly these are future speculations and theory. Ironically, the spraying of chemicals in the atmosphere is engineering a real climate crisis;
- Environmental damage to soil PH, water, animals, trees and plants in Canada by geoengineering is vast – yet Environment Canada has made no attempt to restrict the chemical spraying – even though tree deaths due to altered soil PH is on the rise.;
- The link to human health and the geoengineering has been found to be contributing to Covid-19 infections as well as other viral agents have been found in the atmosphere pollution at large ;
- Evidence of airborne transmission of the Severe Acute Respiratory Syndrome Virus is accepted scientific data. In fact, there is a whole science dedicated to panspermia – the theory that microorganisms or biochemical compounds from outer space are responsible for life on Earth.
- In June 2018 the NIHs Vaccine Research Centre expanded its existing partnership with Moderna to include full-scale research into a pan-coronavirus vaccine platform. The DARPA Deffuse Project by the EcoHealth Alliance having been rejected was also dealing with the spraying of viral agents on wild bats.
- The 1996 BC "**Weather Modification Act**" and "**Weather Modification Act Regulation**" are completely outdated and inadequate to address or regulate the geoengineering industry. This Act is to provide for the obtaining of information respecting weather modification activities, this information is to be made public and any person who fails to comply is guilty of an offence and liable on a summary conviction, however this is not being done. This Act needs to be updated with a hazardous chemicals restriction list, an online public database and stiffer penalties and serious convictions;
- Criminal Code of Canada spraying an unknown substance on someone or their property without consent would be considered a form of assault.;
- Multiple International Treaties have been signed in relation to biological warfare: such as the 1976 Weather Weapons Treaty - in which the legal definition is defined as "*The deliberate use of disease-producing microorganisms, toxic biological products, or organic biocides by either nations or non-governmental bodies to induce death or disabilities in humans and/or animals and/or damage to plant crops, etc.*" - lawin.org;
- Globalist goals from Agenda 21, The Paris Accord, Agenda 2030, and the Green New Deal lead to calls for geoengineering, yet nobody is in charge of the governing of this dangerous technology;

Your petitioners respectfully request that the Honourable House to:

1. *Desist allowing the implementation of geoengineering activities in B.C. airspace in the absence of a governance framework and strict regulatory body for these climate engineering technologies;*
2. *Immediately form a committee to edit the BC 1996 "**Weather Modification Act**" to add a restricted chemical/biological list, a transparent reporting system and stiffer penalties to offenders;*
3. *Call upon the **Minister of Environment and Climate Change Strategy** to take notice of this climate crisis which is destroying trees and thus increasing greenhouse gasses and stop the spraying of our forests - our natural carbon sinks; British Columbia residents feel we are living in an "open air gas chamber" with these geoengineering operations in place and demand closure.*

Dated this _____ day of _____, 20____.
